About Me

Passionate Software Developer with expertise in all stages of software development. Demonstrates the ability to effectively self-manage during independent projects and collaborate efficiently within team settings. Proven track record of quickly learning new technologies and consistently achieving client success and satisfaction.

Skills

Experience

Present

SLB contractor

Carnain AS, Norway/Stavanger

Software development:

Projects:

- LA3D Prejob Petrel Plug-in
- LA3D Automated Interpretation Petrel Plug-in
- LA3D Reservoir Detection Petrel Plug-in
- LA3D Predictive Geosteering Petrel Plug-in

Achievements:

- Implemented new products/features from concept to deployment.
- Proposed and evaluated implementation scheme.
- Transitioned legacy codes to solution.
- Upgraded dependencies.
- Removed outdated dependencies.
- Resolved dependency conflicts.
- Created PowerShell scripts for deployment.
- Integrated Python AI model into the C# codebase.
- Reformed a C++ library and integrated it into the C# codebase.
- Implemented Windows Forms.
- Developed WPF(MVVM).
- Optimized application performance, and code profiling.
- Refactored codes.
- Fixed bugs.

Software Maintenance:

Achievements:

- Created Continuous Integration/Continuous Deployment (CI/CD) pipelines.
- Upgraded plug-ins to align with new versions and resolved conflicts and obsolete codes.
- Managed software commercialization procedures, including obfuscation, signing, and configuring SonarQube & MEND.
- Developed powershell scripts.
- Fixed bugs.

Aug/2022

July/2022

Software Developer(Internship)

Cegal AS, Norway/Stavanger

The main developer of a python web APP which retrieves and processes data from Petrel project & OSDU platform, and visualizes the output.

- Used Cegal Prizm API (Python Tool Pro, Investigator, etc) to develop the APP.
- Contributed to the deployment of this web app, including the docker setting up, dependencies exporting, etc.

Jun/2022

Jan/2019

Project Coordinator

Manguo Network Technology Co., Ltd, China

July/2016

Project : Online reading website and app.

June/2016

Project Manager Assistant, Document Engineer, Technical Writer

Wanin Educational Multimedia Technology Co., Ltd, China

Projects: Document Camera, Webcasting System, HD Lens, VGA Capture Card, LCD Advertising Displayer, Electronic White-board Camera, etc

Jun/2006

Languages

Mandarin	
English	
Norwegian	

Other Projects

2022	Master thesis project • Language & Libs: Python, Steamlit • Web App. • Github. • Implemented & deployed a web app. Developed three algorithms. Designed a 5-step workflow. Proposed a learning & predicting methodology for Pattern recognition.
2021	Responsive Portfolio Website • Language & Libs: React JavaScript, CSS • Web App. • Github. • Implemented & deployed a web app. Implemented PDF viewer, HTML form to email, blog filters, weather APP, animations, etc.
2021-2022	Distributed system for Bank transaction: Go, React Javascript, CSS. [Github] Semantic Answer Type Prediction using Machine learning: Python, NLP, Elastic-search, NLTK, sklearn. Smart contracts: Go, Solidity. Blockchain prototype and client application: Go.

Education

2020-2022	M.Sc. Computer Science	UIS/Norway
	Master thesis: A	
2003-2006	M.Sc. Information Engineering	Zhejiang University/China
	Grade: B	
1999-2003	B.Sc. Information Engineering	Zhejiang University/China
	GPA: 3.42 out of 4	

Awards

2024	Outstanding Performance Recognition.(HQCC, SLB)
